WORK EXPERIENCE

Frontend Developer

November 2022 – Present

Losode Inc, Lagos

- Revamped website codebase to improve search engine optimization, resulting in a 15% increase in organic traffic and a 10% boost in keyword rankings.
- Implemented caching strategies and image compression tools to enhance website performance, leading to a 20% increase in user engagement metrics.
- Ensured cross-browser compatibility and responsiveness by converting Figma and Adobe XD mockups to React JS code with a focus on performance optimization.
- Mentored 2 junior developers, guiding them to contribute significantly to project deliverables.

Senior Frontend Developer

October 2021 – September 2022

Tecmie LLC, Wilmington, Delaware

- Led a cross-functional team of 4 developers in the design and implementation of 6 web applications in various fields including finance, enterprise software etc.
- Collaborated with designers to translate 50+ mockups into functional web pages, ensuring pixel-perfect implementation.
- Integrated AI agent functionalities into web app front-end interface using Next JS and TRPC, allowing users to interact with AI features in real-time.

Full stack Developer

January 2021 – October 2021

Lendanarm, Ibadan

- Analyzed user needs and requirements for 2 fullstack development projects, resulting in precise technical specifications and improved project outcomes.
- Actively participated in 5+ professional workshops and training sessions to stay updated on the latest web technologies and programming practices, enhancing skill set and productivity.
- Incorporated technical considerations, performance requirements and accessibility and privacy, into web design plans for all projects, ensuring compliance and client satisfaction.

Full stack Developer

February 2019 – December 2020

Consultant

- Developed user interfaces for 5+ client projects using HTML5, CSS3, and JavaScript, consistently meeting project deadlines.
- Architected and developed scalable RESTful APIs using Node.js and Express, improving backend performance by 20%.
- Implemented continuous integration and deployment pipelines, reducing deployment time by 10% and increasing productivity.
